

28 June 2006  
The European Parliament  
Brussels

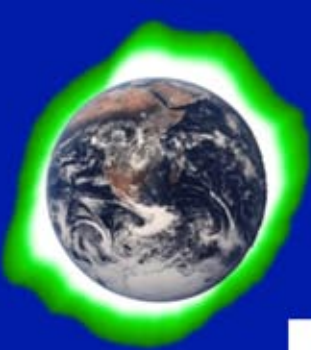

# Global Energy Challenges: The Key Role for Business in Energy Efficiency, Technology Transfer and Emission Reduction

Hosted by  
International Council for Capital Formation, Enel and  
the Belgian-Chinese Chamber of Commerce

*Faced with strong growth in the global demand for energy, what strategies can countries adopt to promote new technologies, encourage energy efficiency and enhance energy supplies? Countries in the Asia-Pacific Partnership have decided to tackle this issue by promoting economic growth, developing new energy efficient technologies and encouraging technology transfer. Will this approach yield positive results?*
