Workshop on EU Energy Supplies: Integrating Climate Change Policies and Renewable Energy Standards with the Goal of a Secure Energy Future

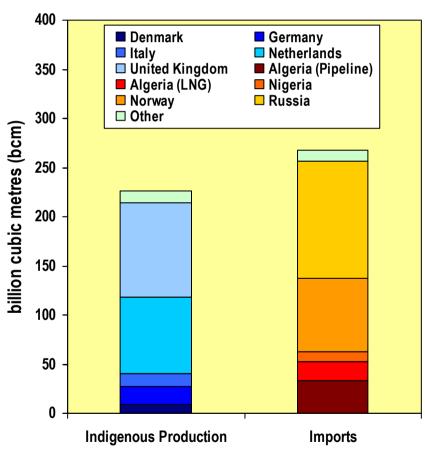

Panel IV: Strategies for Securing EU Energy Supplies while promoting Environmental Policy Goals

The European Parliament Brussels, Belgium - 18 October 2005

# 2004 Gas Supply Situation

# **EU Member States – Indigenous Production vs. Imports EU-25** 2004 Gas Consumption ~ 490 bcm

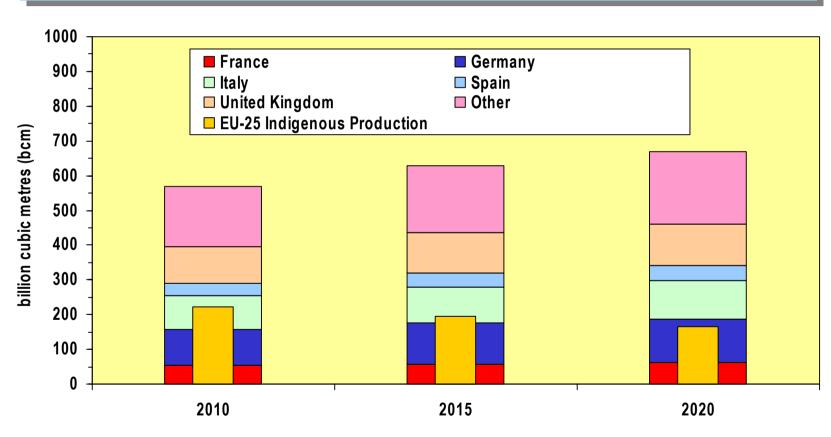

Sources: Cedigaz, BP Statistics, EC (map)

### Gas Demand Forecasts

#### **EU-25 Gas Demand Forecasts**

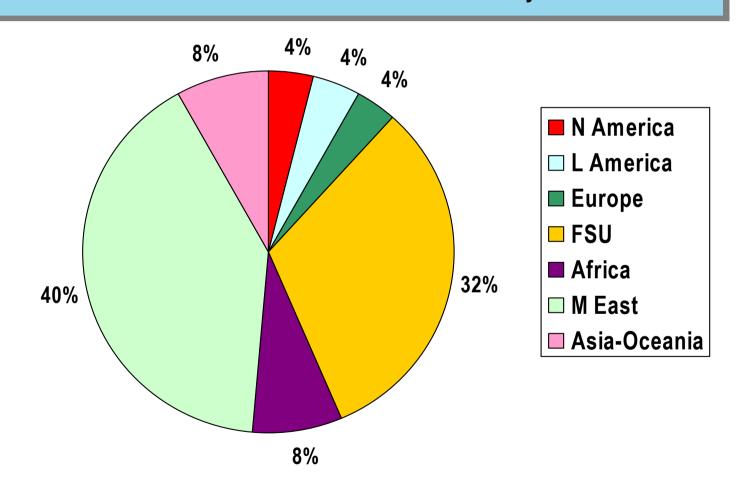

Sources: EC, Cedigaz

# 2004 Proven Gas Reserves (source: Cedigaz 2005)

#### Global Gas Reserves: 180 tcm as of January 2005

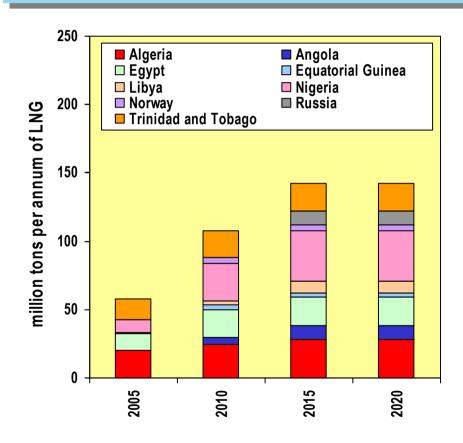

### **Expanding LNG Export Capacity**

#### Potential(\*) Middle East LNG Export Capacity

#### 200 ■ Abu Dhabi ■ Iran □ Oman Qatar ■ Yemen million tons per annum of LNG 150 100 50 0 2005 2010 2015 2020

#### Potential(\*) Atlantic Basin LNG Export Capacity

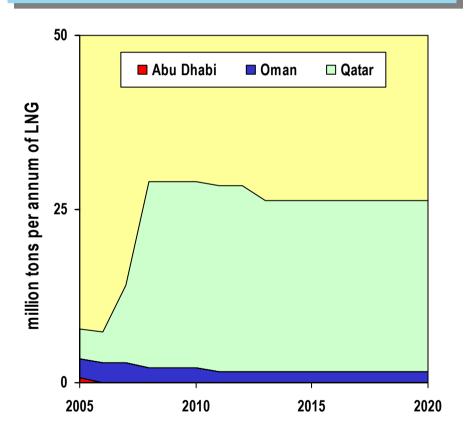

(\*): under construction, planned & other announced projects

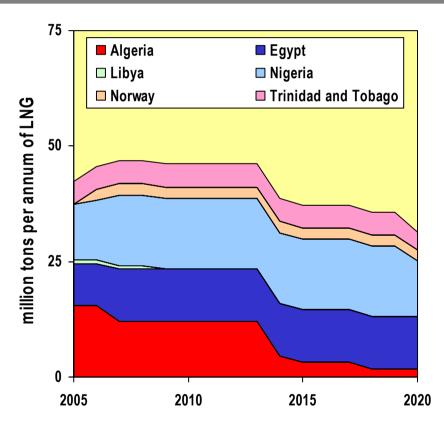

## Contracted LNG Volumes to Europe

#### Middle East LNG Export Contracts to Europe

#### **Atlantic Basin LNG Export Contracts to Europe**

It should be noted that several Atlantic basin contracts will expire before 2015 and their contract renewal status is not known or clear yet

### Conclusions

- Expanding Middle East LNG Exports to Europe will be dominated by Qatari exports
- Incumbent gas exporters will continue to play an important role in supply of gas to Europe
- Increasing importance of African LNG exporters competing against Middle Eastern exporters
- Uncertainties about achievable export potential of some Middle Eastern gas producers
- Significant funding requirements for gas infrastructure development to meet projected European gas demand → Need favorable policy/regulatory measures to facilitate gas infrastructure investments along the LNG chain in gas consuming and gas exporting countries
- Economies of gas exporting countries are heavily dependent on gas exports to key energy markets such as Europe → Thus, there is a need to address both security of gas supply and security of gas demand concerns
- Development of a more competitive market environment for supply of gas to Europe, but gas market developments in the US will have an impact on future prices of gas supplies to Europe
